By using Smart Living technologies as thematic playground, CARE4TECH transforms the accessible but spread research, tech- and innovation scene into a stable EU leading knowledge development arena, to foster cooperation between public institutions, academia, business and civil society in the Alpine Space area.

Smart Living uses innovative digital technologies, sensors, social behavior analysis and data processing in different fields of application such as mobility, health, energy, manufacturing.

By participating at the project, enterprises and institutions can take advantage of innovations in other regions, transregional networking and upcoming project workshops in the different fields of Smart Living.

### Target groups:

Companies in the sectors health, manufacturing, mobility, ICT, as well as innovative service companies, Research&Development institutions and public authorities.
